

RAPP

Technology mediated addiction recovery support

ERRIN Health Brokerage event

21-22 June 2016

Who we are

- Region: Norway – Southwest
- Partners:

Klepp municipality, project owner

Recovery
kompetanse

Recovery Kompetanse, (user-organized company), project management

Lyse, technology development

Centre for alcohol & drug research,
Stavanger University Hospital

What our idea is

- **To develop, implement and test communication technology solutions that can enhance the access to and collaboration between professional and non-professional partners, to deliver effective support to people in different phases of their recovery from alcohol and/or drug addiction.**
- **Rapp1: Support in situations with increased risk of relapse**
- **Rapp2: Support to reach professional help in lapse- and relapse situations**
- **Rapp3: Support to cope with small and big challenges in daily life**

Whom we are looking for

- Organizations engaged in the integrated use of communications technology support for people in recovery from alcohol/drug addiction:
 - Public services
 - User organizations
 - Technology developers
 - Research organizations
